

NHW-A Series

Non-condensing Tankless Water Heaters

One of the most advanced
non-condensing tankless
on the planet, for the planet

NHW-AI

Interior
model

NHW-AE

Exterior
model

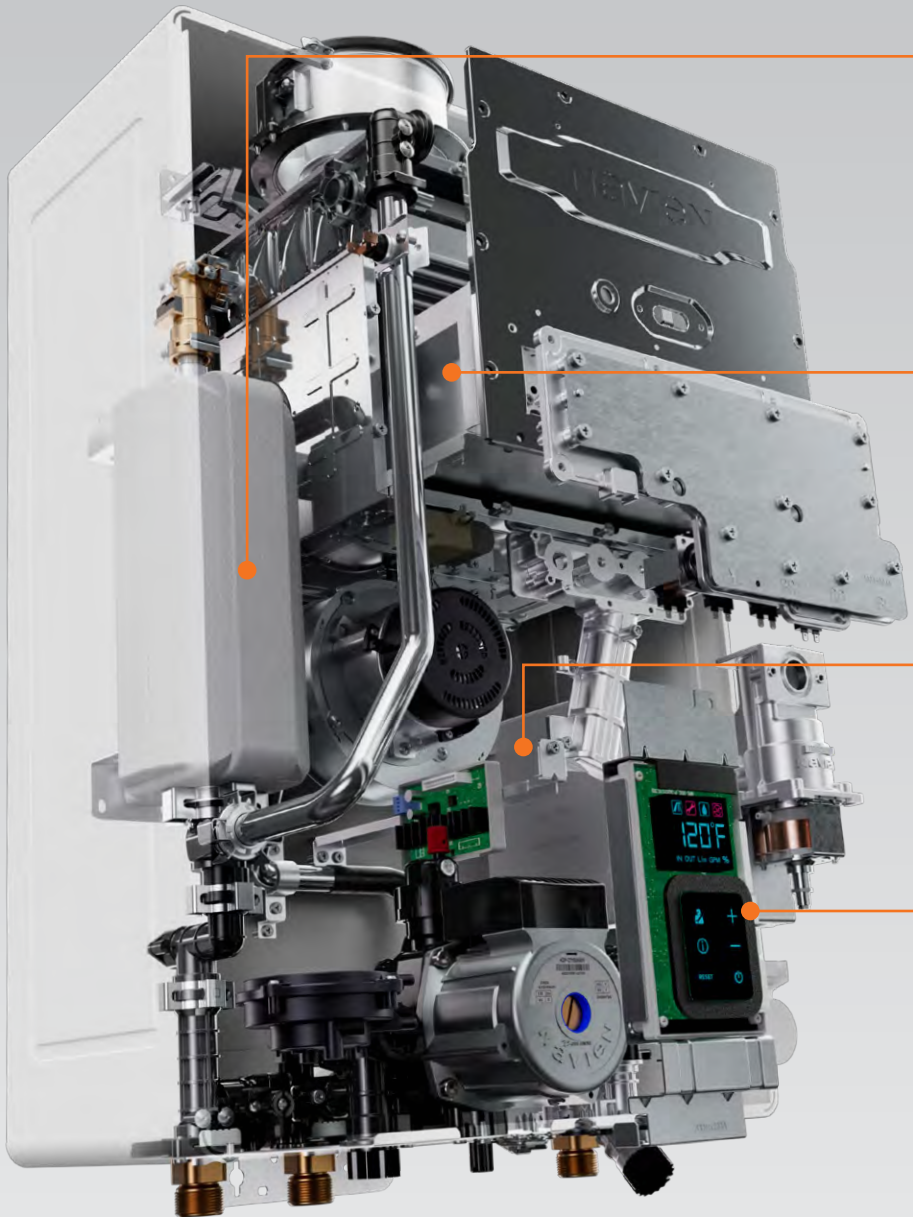

NHW-A tankless water heaters are smart and eco-friendly. They save water and energy by heating water only when it's needed, unlike traditional tanks. And our patented stainless steel burners have a low NOx precision flame control system that's good for the planet.

Enjoy the life-changing comfort
of Navien endless hot water

More for the money
with so much innovation
built right in

Built-in patented ComfortFlow® recirculation system

The first and only non-condensing tankless with a built-in recirc pump and buffer tank. This system promotes a consistent water temperature and minimizes the “cold water sandwich” effect.

Built-in patented NaviTech stainless steel heat exchanger and burner

Durable stainless steel and a Navien-exclusive design contribute to NHW-A's dependability and performance.

Built-in hardware and software for internal and external recirculation

No need to add separate controls to operate the system. Multiple options are included to provide hot water when and where you want it.

Built-in intuitive control

Adjusting temperature along with viewing operation status is right at your fingertips.

Other built-in components:

Integrated air pressure sensor and water adjustment valve make the NHW-A an amazing value.

The practical luxury of Navien ComfortFlow[®] built-in recirculation system

Navien is the innovator in water heating technology, and the ingenious ComfortFlow[®] recirculation* system is no exception. Now you can get endless hot water faster, any way you want it. The built-in control can be programmed to **Always On, Weekly,**** or even an **Intelligent** mode, which automatically adapts to how you use hot water.

NHW-A with ComfortFlow is the perfect blend of practicality and luxury.

*Recirculation applications may vary. Please consult with your installer as additional plumbing or equipment may be required.

**Weekly requires the addition of the remote (included with NHW-AE, but optional with NHW-AI).

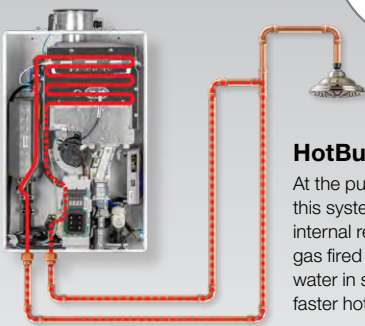

Endless hot water
only when you
want it

Space-saving
design

Optional on-demand
recirculation system

HotButton®

At the push of a button,
this system activates the
internal recirc pump and
gas fired burner to heat
water in supply line for
faster hot water.

Expandable for large homes

Optional WiFi remote
control system

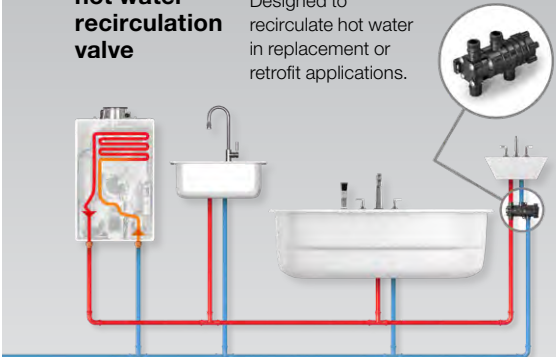

NaviLink®

This add-on accessory
enables remote access via
smart phones and tablets
to control temperature,
view usage status and
troubleshooting.

Optional
hot water
recirculation
valve

NaviCirc™

Designed to
recirculate hot water
in replacement or
retrofit applications.

NHW-A tankless is a great fit for any size home, inside or out

Navien packs a lot of performance into these durable, compact tankless units, providing options to install in small interior or exterior areas. The NHW-A units deliver endless hot water efficiently and never run out like bulky tank water heaters.

water heater
in North America

NPE-2 series are the most innovative condensing tankless water heaters on the market

- NPE-A2 ComfortFlow® built-in recirculation system can reheat water in supply lines with recirc loop.
- Durable dual stainless steel heat exchangers and burner.
- Ultra efficiency for lower energy bills and exhaust emissions.
- Strong residential warranty and gentle on the planet.
- Available in natural gas or LP gas and high altitude.
- Compact, stylish, wall-hung design — up to 80% smaller than traditional tank water heaters.

How Navien NPE-2 series tankless water heaters work

Navien premium condensing tankless unit heats water directly without using a storage tank. Cold water travels into unit when the hot water faucet is turned on. The gas burner in the dual heat exchanger heats the water which delivers an endless supply of hot water wherever it's needed.

Bulky tanks are history...Navien high efficiency **compact** tankless is the **future**

Traditional tanks

- Tanks run out of hot water during heavy demand.
- A standard 50 gallon tank may take up to 16 square feet of floor space.
- Even when hot water is not required, the tank is being heated.
- Tanks are up to 30% less efficient than tankless.
- 6-9 year warranty and an expected lifespan of 10-15 years.

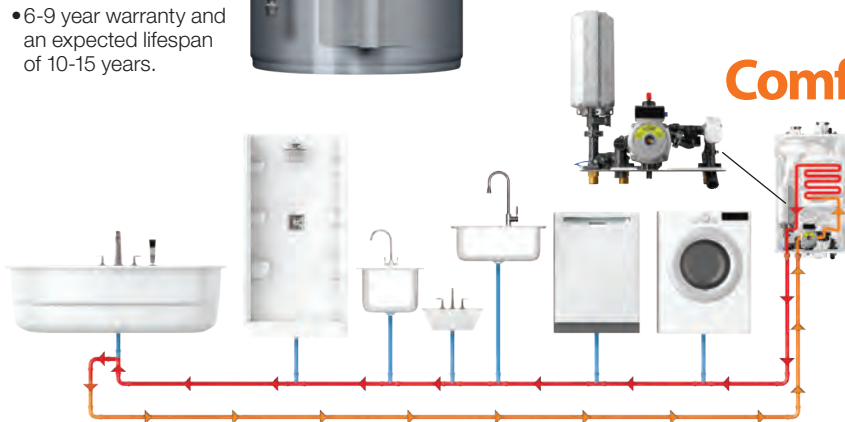

Navien tankless

- Endless hot water when you want it.
- Energy Star certified up to 0.96 UEF efficiency.
- Compact space saving design.
- Lower energy bills, longer life.
- 15 year warranty dual stainless steel heat exchangers.

ComfortFlow[®]

Built-in recirculation system on NPE-A2 which includes buffer tank and recirculation pump. The system heats water in supply lines via recirculation loop.

We make it easy to go tankless

Navien proven
practical
 luxury...
 the comfort of
endless
 hot water plus
 energy and
 space savings

**Endless hot water
 only when you want it**

Navien tankless water heaters deliver a continuous flow of hot water for as long as you need it. There's no waiting for a storage tank to warm up.

Longer life, strong warranties

Navien was first to offer durable dual stainless steel heat exchangers. Navien's advanced technology and superior craftsmanship assure that your tankless water heater will provide years of trouble-free service with a longer life expectancy than a standard tank water heater. For added peace of mind, we offer one of the industry's strongest warranties.

Application		Labor	Parts	Heat exchanger
Residential	Standard or controlled recirculation	1 year	5 years	15 years
	Uncontrolled recirculation	1 year	3 years	5 years
Commercial or Combi*	Standard or controlled recirculation	1 year	5 years	8 years
	Uncontrolled recirculation	1 year	3 years	3 years

*Combi refers to a combination potable water and space heating application. Water heaters cannot be used in space heating only applications.

For complete details please refer to the full warranty at Navieninc.com.

Lower energy bills, easier on the planet

Navien condensing stainless steel heat exchangers recover extra heat that would be lost in non-condensing water heaters. The result is a reduction in energy consumption, lower CO₂ emissions and low exhaust temperatures allowing the use of less expensive PVC venting.

Credits and rebates

There are a variety of energy efficiency credits and rebates available.
